FOR IMMEDIATE RELEASE

## **\$350 Million International Corporation Chooses Synchronism™ For Call Center and Disaster Recovery**

Storage Engine's Synchronism Appliance Installed and replicated 6.4TB data migration and replication solution onto live systems within 16 hrs.

**TINTON FALLS, NJ, January 6, 2006**--Storage Engine, Inc., an innovative provider of fault tolerant enterprise storage solutions announced that another international firm has chosen Storage Engine's Synchronism appliance to centralize the management and control their data storage resources while enabling them to provide disaster recovery of their vital information. In particular, they installed, mirrored and replicated their Microsoft SQL data of multiple servers all within 48 weekday hours start to finish. Enabling them to go live without an extensive implementation period and without any downtime.

This customer chose to leverage the benefits of a Storage Engine's storage solution to manage the rapid growth of its Microsoft® Windows® business-critical applications, increase data availability, and reduce total cost of ownership. Storage Engine's Synchronism solutions help companies simplify storage management within their current infrastructure and provide replication of their vital data over IP to a disaster recovery site with a secondary appliance.

Synchronism makes it easier for network managers to understand, deploy, and manage in their existing infrastructure and for a broad range of applications. Storage Engine's iSCSI appliance helps customers deliver a complete IT storage solution today and gives the best option for scaling storage infrastructure's, and meet the business needs in the future.

iSCSI technology can leverage the same management tools across all Microsoft applications on a single Storage Engine infrastructure, which improves our uptime and reliability. iSCSI makes it simple and painless for customers to grow and at a reasonable cost.

Storage Engine Synchronism solutions are available today for most systems including: Microsoft Windows, Linux®, Novell NetWare™, Sun™ Solaris™, IBM AIX, and HP/UX environments.

**About Storage Engine:**

Storage Engine, Inc., is an innovative high technology provider of fault-tolerant data storage and document imaging solutions and services that store, protect and manage data in complex networks with greater ease and superior cost savings. The company's Synchronism™ product line and its Synchronix™ systems, are all modular units that can be configured and stacked to meet customers' specific and expanding data storage requirements. The Company also provides document imaging solutions and services. For more information visit us at [www.storageengine.com](http://www.storageengine.com), or call 1-866-734-8899.

Synchronism and Synchronix are registered trademark of Storage Engine Inc.
