FOR IMMEDIATE RELEASE-

Storage Engine Release's Heterogeneous Continuous Data Replication Appliances

Interoperability Solved with Appliances that Meet Compliance Needs

TINTON FALLS, NJ –January 11, 2006—Storage Engine, Inc., an innovative provider of fault tolerant enterprise storage and content management solutions and services, today announced that it has released its Synchronism Appliance(s) with Continuous Data Replication/Protection (CDR/CDP) features. The Synchronism Appliance enables IT users to centralize large storage environments and multi-vendor environments to gain control and efficiency of their existing and growing storage systems. With the introduction of the CDR/P feature for Synchronism, these appliances can quickly and cost effectively enable users to meet compliance mandates for public and private firms, including the new NYS Security Breach and Notification Act, in a cost effective way utilizing a sites current investment in storage and network technology. The CDR/P feature ensures a second copy of information is always present, locally or remote to ensure safety of data and transfer of encrypted files.

Synchronism Appliances have already been deployed by many commercial enterprises and government agencies to meet their growing data storage needs and compliance requirements including The New York City Mayors Office, The New York District Attorney, ESPN, and the U.S. Army among many others.

Storage Engine has for years has powered multi-vendor and large storage farms to be utilized in a centralized, flexible, open and efficient way to ease storage management and enable users to meet compliance requirements seamlessly for any topology or storage need.

About Storage Engine:

Storage Engine, Inc., is an innovative provider of data storage solutions and content management solutions for enterprises and departments that serve a wide range of business and government markets along with a wide range of other services to enable the capture, tracking, storing, sharing, replication and utilization of information assets, with compliance, cost effectively.
