**FOR IMMEDIATE RELEASE-**

## **New Data Storage Order Received for \$1.3 million**

Tinton Falls, NJ--- October 2, 2009: Storage Engine announces another order for \$1.3 million of the Synchronism data storage solutions for a major metropolitan transit system to harness, protect and virtualized their high performance data storage assets.

Synchronism is used nationwide by commercial and government users to solve all their data storage needs and requirements. Synchronism will provide them with a solid foundation to grow, centralize and virtualize their multi-vendor data storage environment. We are proud to add another user to our growing installed base of enterprise users.

### **About Storage Engine:**

Storage Engine, Inc., is a leading responsible provider of data storage solutions and document imaging solutions for enterprises and departments that serve a wide range of business and government markets along with a wide range of other services to enable the capture, tracking, storing, sharing, replication and utilization of information assets, with compliance, cost effectively.

Storage Engine competes against large corporations including EMC (NYSE-EMC), Network Appliance (NASDAQ-NTAP) and Hewlett Packard (NYSE-HP), among others.
